Qualicare[®]
FAMILY HOMECARE

**Flexible
Healthcare
Solutions**

Do you or someone you love need extra care?

When illness strikes, families are often faced with challenging and sometimes overwhelming choices. The need for additional care can become a reality whether you're in the hospital or at home.

Are you feeling overwhelmed as a primary caregiver for an ill or elderly loved one?

Your need could be for someone to simply visit for a few hours and assist with daily chores – or perhaps a more comprehensive healthcare approach is required.

Qualicare® is the answer.

Help to remain at home

We can help you stay at home when faced with acute or chronic illness or dealing with challenges associated with aging. Our clients feel safe at home, supported by our 24/7 on-call nursing services.

Help while in hospital

Many people require private care, while in hospital, to help promote positive outcomes. Our early involvement and proactive program helps facilitate discharge from hospital, ensuring a safe, smooth and successful return home.

Comprehensive care

Qualicare can provide extra care or will manage and coordinate all healthcare activities. When you're challenged with a medical event, call us to ensure you get the care and attention you deserve. We can help.

**Total Care
at home or in a hospital**

Nurse managed care

All of our care is managed by nurses. Whatever your need - hourly or live-in care, temporary or long-term - we respond quickly with staff you can trust and depend on. We pride ourselves on continuity of care and highly trained caregivers, ensuring patient comfort and safety.

Comfort & Peace of Mind

Unparalleled service

Founded in 2001, Qualicare makes it possible for people to stay at home and reduce their risk of hospital visits. An exceptional team of Case Managers and certified caregivers provide unparalleled and expert personal care and healthcare management.♥
