You decide what you need and we will introduce qualified caregivers from whom you can make your selection.

Our Purpose

At [Living Assistance Services](#), all of our efforts are devoted to helping you or your loved ones maintain happy, healthy and independent lives.

At the same time, we relieve family members of the stress of trying to provide all the necessary care themselves. Your loved ones can maintain their independence in their own home without expecting their family and friends to spend too much time providing care. We provide all the activities & daily living needed, according to your schedule, wherever it is needed.

Our Team

We are able to provide first-rate service because of how meticulous we are in selecting Caregivers and Professional Associates. Our Caregivers are all employees of the company and our Professional Associates are selected for their particular skills and their personalities. Our objective is to always provide the precise type of care that is needed.

Caregivers

We are confident in our ability to provide excellent service as we only employ the best caregivers. In fact, only one or two of every 150 prospective caregiver applicants are accepted because we insist on a strong employment history and place a significant emphasis on intangible traits such as a caring personality and a desire to help people.

The secret of our success is really no secret at all. From the Director to the Associates and Caregivers, we are dedicated to see that each contact with our Care Recipients and their families is helpful and memorable. The "secret" is, in fact, the people!

Our caregivers also possess a Personal Support Worker Certificate or equivalent and will have a minimum of two years of experience. Not only do they have the necessary skills, they often have experience specific to particular conditions and diseases. Many of them also drive and can help with errands, shopping and other out-of-home activities.

We also meticulously check references from previous employers and we require a Police Clearance Certificate from every caregiver.

Unlike most other home care companies, we encourage our clients to choose the caregiver they are most comfortable with from a selection of qualified candidates. The result is a very low turnover and both our clients and caregivers tend to stay with us for years rather than months.

When you meet our caregivers, we think you will be delighted to discover that at [Living Assistance Services](#), character matters!

Professional Associates

Our Professional Associates may be individuals, members of a group practice or another organization. They include physiotherapists, chiropractors, social workers, massage therapists and many other professions.

They will provide services in your home or wherever they are needed. They are personable, reliable and dependable. We work with them, after careful screening, because they share Living Assistance's desire to provide the best care possible.

Rates and Hours

We can provide only a few hours of caregiving, or 24-hour live-in service. Typically, specialized services, such as nursing, are needed for only an hour or two, while general caregiving may be required for longer periods of time. Our rates are reasonable, and you can decide what is appropriate for you or your loved one.

Who we are

[Living Assistance Services](#) is a Canadian owned and operated company with multiple offices serving the GTA, including Toronto, Thornhill, Markham, Richmond Hill, Vaughan, Mississauga, Oakville and Burlington.

The well being of our care recipients is our primary concern. As a result we have received many glowing testimonials, which we would be happy to share with you.
